PRESENTACIÓN Y CONTEXTUALIZACIÓN

ECTS: 5

1 semester

This course concerns the structure and functioning of European Union Courts which includes not only the study of the organs of this nature, but also their functioning in the European Multilevel system, which leads to interrelate their competences with those of European Union Member States courts, where appropriate.

The Court of Justice interprets EU law guaranteeing an uniform application in all EU Member States. Both, its composition and functions are complex but the establishment of a jurisdiction in the EU is one of its most important features. Through this course, students have to meet a knowledge of the jurisdictional structure in the European Union by studying the European Court of Justice: concept, structure and functions; the General Court: concept, structure and roles; and roles and relationships of both of them with internal organs of EU Member States.

This Official Master on the European Union offers students a high-level academic education that allows them to achieve optimum conditions to develop their professional and academic career. It is intended to provide students with a high-level training that will place them in optimal conditions to work in professional or academic environments.

The fundamental role of this type of degrees in European Union countries is a consequence of the central place a college education must have for a better understanding of the process of integration. For this reason, the different degrees in European Union Studies are a priority for the European institutions and Member States, among which UNED is not an exception.

REQUISITOS Y/O RECOMENDACIONES PARA CURSAR ESTA ASIGNATURA

- a) Those established for the admission to the Master and specifically for the itinerary in English.
- b) For the analysis of foreign documents, knowledge of any of the official EU languages will be an asset
- c) Generally, in this Law speciality it is helpful if the student is familiar with the terms

(glossary) that are commonly used in the European Union, which will allow more and better understanding of the information.

d) It is equally relevant in this course that students have basic computer skills, since such skills are needed to follow the course. Students need to access learning materials and other information through these systems.

METODOLOGÍA

This subject will be taught according to the distance education methodology that characterizes the UNED. Thus, students face a self-learning process but assisted by the teacher.

The education process is articulated through various communication distance learning systems. Within these systems, the Master in European Union is provided with support in a virtual interactive platform where the student finds both basic materials and supplementary

teaching materials, information, news, exercises and is also trained to perform the evaluation for different subjects. More specifically, the virtual platform will contain: legislation, case law, internet links, a glossary of terms, teaching materials, exercises.

In addition teaching team will use additional communication distance systems to support students as Twitter, Facebook specific pages, and a Telegram canal.
